WARNING!!!!!! IMPORTANT!!!!! WARNING!!!!!

- FAILURE TO READ AND UNDERSTAND THESE INSTALLATION PROCEDURES MAY RESULT IN SERIOUS INJURY OR DEATH.
- MAKE CERTAIN THAT THE SAFE-T-STRAP HAS NOT BEEN DAMAGED IN SHIPMENT PRIOR TO USE.
- THIS SAFE-T-STRAP IS AN ENGINEERED PRODUCT. IT MUST BE RETURNED TO THE ORIGINAL SUPPLIER FOR REPAIR (IF REQUIRED)
- SYNTHETIC STRAPS SHOULD NOT BE USED IN EXCESS OF 200 DEGREES FAHRENHEIT. AVOID DAMAGING FROM WELDING SPARKS AND CORROSIVE CHEMICALS.
- CAREFULLY READ AND FOLLOW ALL INSTALLATION INSTRUCTIONS AND ALL SPECIFICATIONS FOR USE OF THIS PRODUCT.
- SAFE-T-STRAP IS A NON-REUSABLE FALL-ARREST SYSTEM AND WE ASSUME NO LIABILITY CONNECTED WITH ITS RE-USE
- THE USER IS REMINDED BEFORE A SAFE-T-STRAP IS ATTACHED TO ANY MEMBER OF A PROJECT, THE MEMBER SHALL BE SO FRAMED, FASTENED, TIED AND BRACED SO AS TO PROVIDE THE REQUIRED STRENGTH AND RIGIDITY
- THE SAFE-T-STRAP IS A COMPONENT OF A FALL-ARREST SYSTEM. LOCATION OF INDIVIDUAL STRAPS WILL VARY AND SPECIFIC PROCEDURES FOR INSTALLATION WILL BE REQUIRED TO ENSURE ADEQUATE FALL PROTECTION FOR WORKERS.

CAUTION: USER IS REMINDED THAT A LANYARD MUST BE CONNECTED BETWEEN THE WORKER’S SAFETY BELT AND THE SAFE-T-STRAP

INSTALLATION INSTRUCTIONS

SAFE-T-STRAP CONSISTS OF A TWO INCH WIDE WEBBING, WITH A 2 ½” D-RING ATTACHED AT ONE END. THE OTHER END OF THE STRAP IS FOLDED AND STITCHED IN PLACE (ALL NAILS USED TO SECURE THE SAFE-T-STRAP MUST BE HAMMERED THROUGH THE FOLDED STITCHED AREA). ALSO APPLIES TO THE “NO D-RING” MODEL.

SAFE-T-STRAP IS TO BE INSTALLED AS FOLLOWS:

THE SAFE-T-STRAP MUST BE ATTACHED AS SHOWN USING STANDARD 3” ARDOX NAILS AND PROVIDES AN ANCHOR POINT WITH A TESTED FAILURE STRENGTH PROVIDED THE FOLLOWING STEPS ARE ADHERED TO. SEE FIGURE 1

USING TWO ARDOX NAILS THE FOLDED STITCHED END OF THE SAFE-T-STRAP IS ATTACHED TO THE TOP PLATE OF THE WALL OR TRUSS. (NOTE: THESE NAILS MUST BE HAMMERED IN PLACE SECURELY). THE SAFE-T-STRAP IS THEN WRAPPED ONCE AROUND THE SINGLE TWO-BY-FOUR (OR DOUBLE TWO-BY-SIX) AND A THIRD NAIL IS HAMMERED THROUGH BOTH STRAP SURFACES. SEE FIGURE 2

NOTE: It is recommended by The Safe-T-Strap Company that: before the truss is raised, fastened and braced in place, a life-line of sufficient length is attached to the Safe-T-Strap to ensure safe access to the roof.

WHEN INSTALLING SAFE-T-STRAP ON FLOORS, A THREE INCH ARDOX NAIL MUST BE INSERTED THROUGH THE STITCHED LOOPED END OPPOSITE THE D-RING. STRAPS SHOULD BE PLACED A MEASURED DISTANCE FROM THE PERIMETER OF THE FLOOR INCLUDING THE LENGTH OF THE LANYARD USED TO ENSURE ADEQUATE TRAVEL RESTRAINT. IT IS A REQUIREMENT OF THE ENGINEERED SYSTEM THAT FOUR (4) OF THE DOUBLE-HEADED NAILS SUPPLIED TO SECURE THE STRAP TO THE FLOOR, ARE NAILED INTO A FLOOR JOIST BELOW THE PLYWOOD FLOOR. SEE FIGURE 5
